PROFESSIONAL SUMMARY

Backend Software Engineer with 2.5 years of industry experience specializing in Python API development, database optimizations, and distributed data pipelines.

SKILLS

? Languages: Python, SQL, Bash

? Web Frameworks: Flask, Django

? Databases: PostgreSQL, SQLite, Redis

? Tools: Git, Linux, Postman, JIRA

? Concepts: RESTful API design, Unit Testing, Agile/Scrum

WORK EXPERIENCE

Backend Developer | FinSecure Systems

Feb 2023 - Present

? Designed secure REST API endpoints with Python and Flask for financial transaction processing.

? Created PostgreSQL queries and database migrations ensuring strict ACID compliance.

? Implemented Redis key-value stores to rate-limit public endpoints and cache auth tokens.

? Managed source code repositories and feature branches using Git.

Junior Software Engineer | DataCraft Labs

Aug 2021 - Jan 2023

? Assisted in writing unit and integration tests for Python backend services.

? Performed database maintenance and SQL query optimization on PostgreSQL databases.

EDUCATION

Bachelor of Science in Software Engineering

University of Texas at Austin (2017 - 2021)
